ABOUT NIR RAN

Designer. Artist. Father of 2 sons. Very passionate about unique spaces. Similar to the fascination that visitors experience at museums, I'm enthralled & excited by places that tell a story. My initial design thoughts are never about the materials themselves: wood, steel or whatever.

Rather, they're always about feelings, sensations & passion. What story should this place tell? What concept is most desirable, most appropriate? And, most importantly: What feeling or feelings do we want others to experience? And, aside from indifference, all options are on the table...

Fifteen years of nightlife and restaurant experience has crystalized my realization that what truly interests me is providing others with environments & situations that excite & stimulate the soul – and this has become my occupation. I couldn't ask for more.

Nir Ran

"A Story Told Thru Design"

IT'S HARD TO ARGUE WITH SUCCESS

My studio belongs to my clients. Their success is our success & that's always been the guiding light, what inspires & motivates us.

Staying within an agreed upon budget & timeframe, we manage projects from their conceptual birth – through all stages of planning & construction – until the celebration of their opening.

Over 70% of the projects we helped execute during the past decade are still thriving businesses today & a source of considerable pride. This, we believe, attests to a successful “marriage” between our sound business acumen & arresting designs that captivate audiences.

Together, we can create those memorable experiences that you and your clients live for.

PART OF OUR SUCCESS'S

CLUBS
